CEO's message

Dear partners!

We are pleased to present you the catalog with Neva Metall Posuda product overview. You will learn about our company, basic manufacturing standards, and characteristics of our products. Our company was founded in 1999. For over 20 years, Neva Metall Posuda has been continually developing, by introducing the new technologies and expanding the manufacturing capacities, which has made Neva Metall Posuda one of the current leaders in the industry*.

Transparency and integrity are our operating principles. This approach enables our continuous development in the market and expansion of our partners.

We cooperate with all major federal retail networks and distributors in the Russian Federation. Our products are available in most of the CIS stores. Our product sales geography expands from year to year.

We believe that cooperation with real professionals is a driver of success. For this very reason we are happy to develop business together with you!

*According to GFK, Neva Metall Posuda is a leader in production of cast-aluminum cookware in Russia.

Sincerely yours,

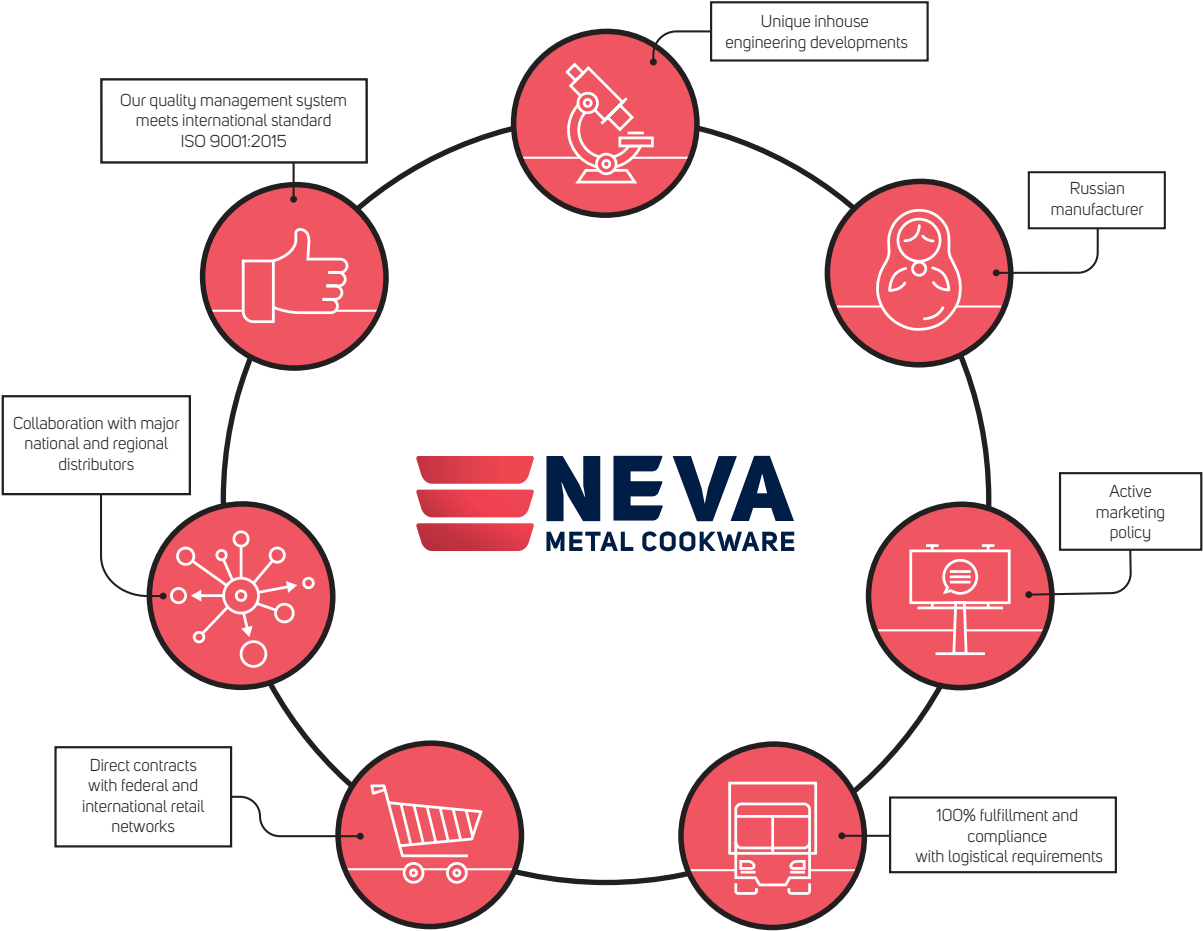

Alexander Sheremetyev

Chief Executive Office, Neva Metall Posuda Group, LLC –
Management Company of NMP JSC

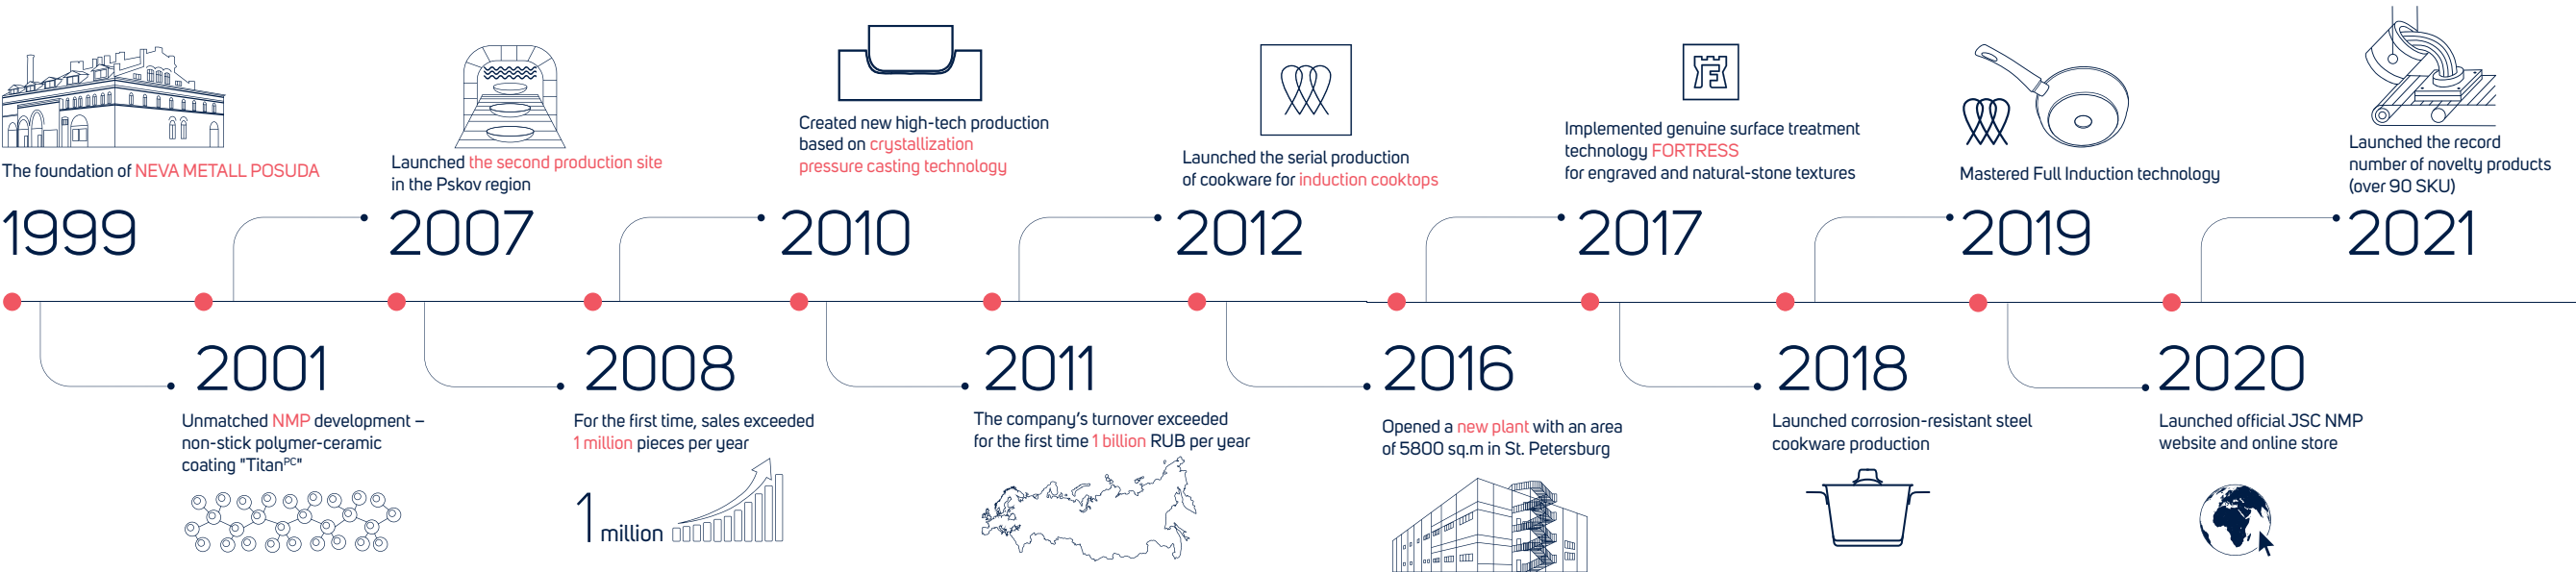

About us

Joint-Stock Company Neva Metall Posuda is a Russian manufacturer of cast aluminum cookware with non-stick coating. The company was founded in 1999 in St. Petersburg. Since its foundation, the company's strategy has focused on development and manufacturing of a cookware with unique consumer properties and quality. Our product quality and consumer properties meet the highest standards and are awarded by the professional community. Joint-Stock Company Neva Metall Posuda products are awarded with the Russian Brand, Best Goods of the Year, 100 Top Products of Russia, Made in Russia, Made in St. Petersburg prizes.

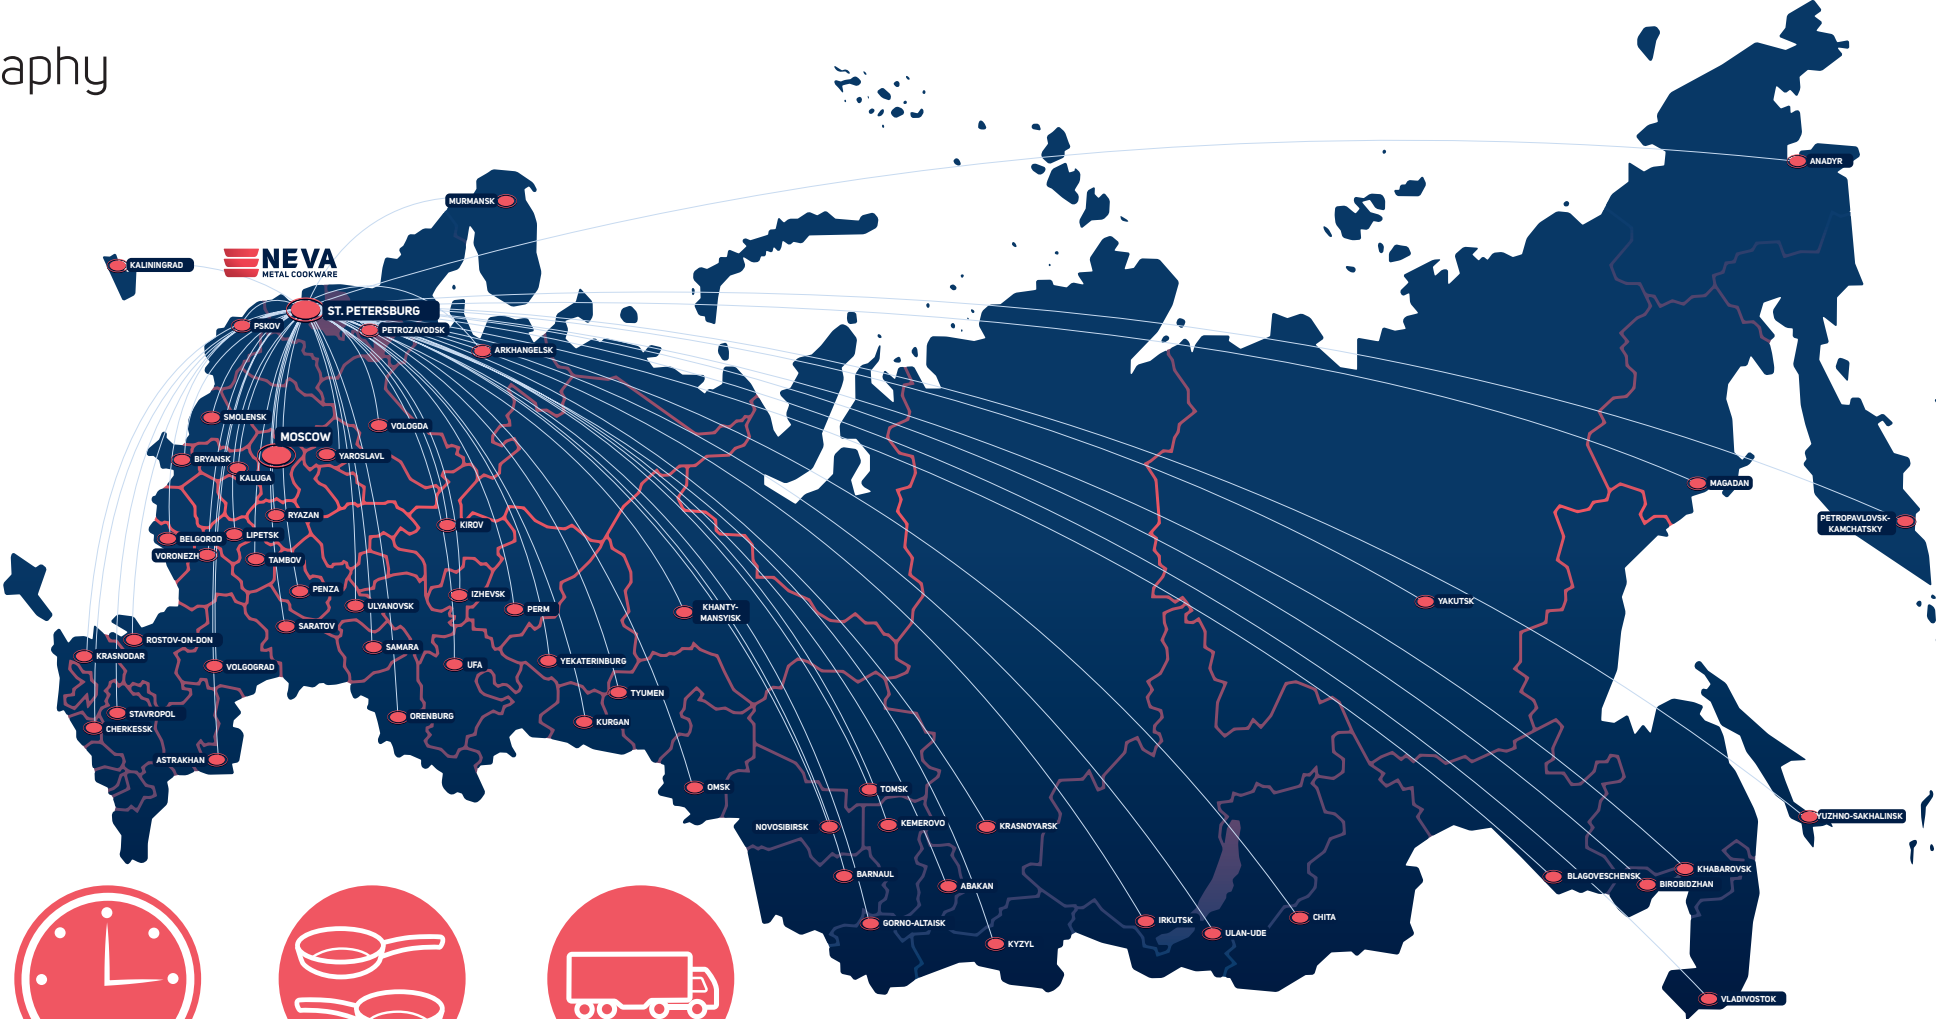

With active support of JSC NMP, we have developed the national RF standard GOST R 56674-2018 "Non-Stick Cast Aluminum-Alloy Cookware. General Specification". The new standard was approved by Rosstandart Order No. 379-st. of July 3, 2018.

About brand

TRUST IS A CORNERSTONE OF OUR WORK

We know that you are an outstanding personality with many talents and unexplored huge creative potential. And we believe that the experiments at your kitchen will really help unleash your abilities. We therefore do our best on a daily basis to give you a powerful tool for any culinary achievements.

No matter what you would wish to cook today, no matter which gastronomic perfection you decide to attain tomorrow. You can always be sure in Neva Metall Posuda as a manufacturer of durable and friendly-to-use cookware. The cookware able to deal with any challenge.

WHY ARE WE CONVINCED IN IT?

Values of Neva Metall Posuda brand are what make us confident in our product quality.

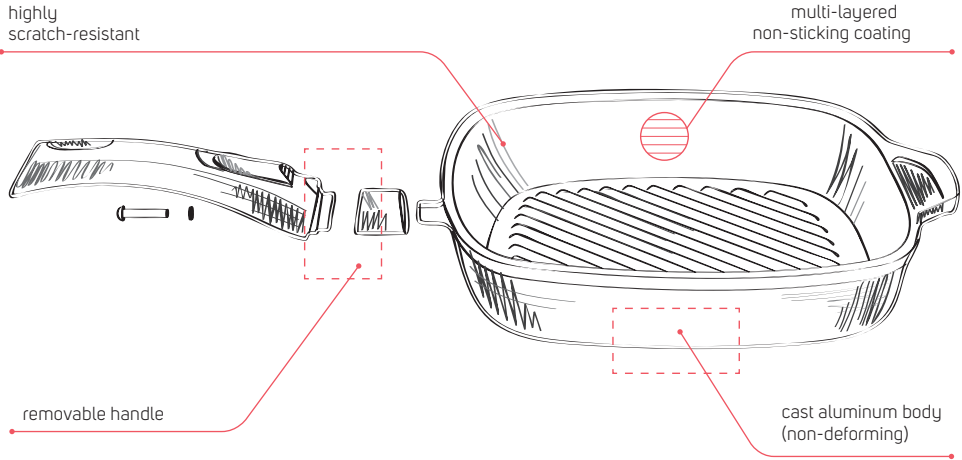

About products

Individual number on the bottom of each product is a quality warranty.

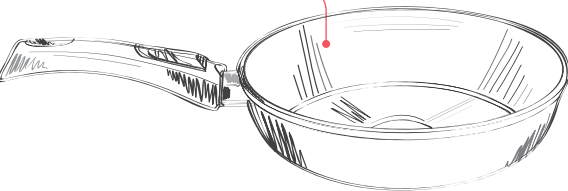

Neva Metall Posuda frying pans are manufactured only in Russia. Quality, safety, consumer properties and employed technologies meet the level of global brands. We apply multi-tier product quality control at all manufacturing stages.

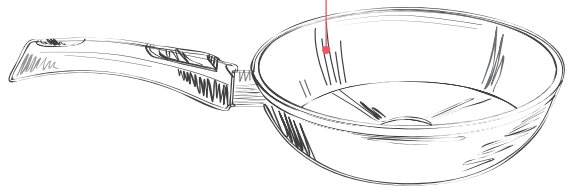

Cookware body shapes

TRADITIONAL BODY

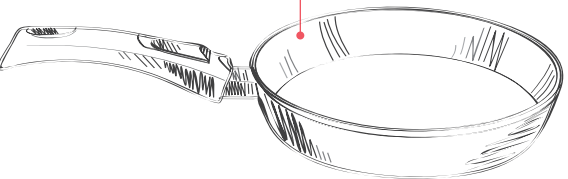

Versatile pan with high tapered walls.
Suitable for frying, stewing.
Diameters: 20–30 cm. Thickness: wall 3.8 mm / bottom 6 mm.

COMFORTABLE BODY

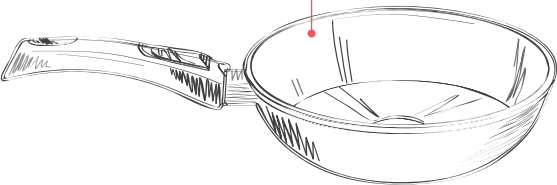

Versatile pan with high tapered walls.
Suitable for frying, stewing.
Diameters: 22–30 cm. Thickness: wall 3 mm / bottom 6 mm.

LOW-WALL BODY

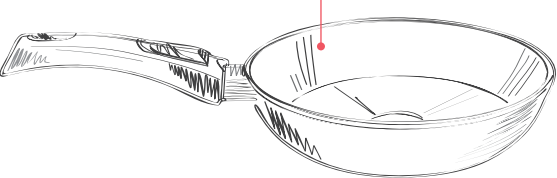

Versatile pan with low tapered walls.
Suitable for frying.
Diameters: 18–28 cm. Thickness: wall 2.4 mm / bottom 4 mm.

LIGHT-WEIGHT BODY

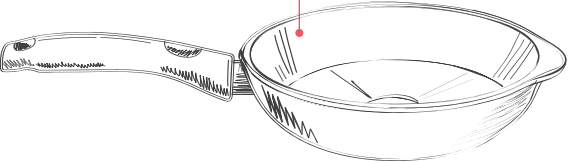

Light-weight pan with tapered walls.
Suitable for frying, stewing.
Diameters: 20–28 cm. Thickness: wall 2.9 mm / bottom 4 mm.

ULTRA-LIGHT BODY

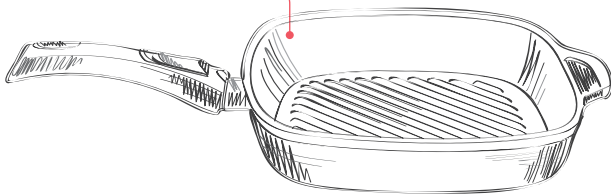

Ultra-light pan with low tapered walls.
Suitable for frying, quick heating.
Diameters: 22–28 cm. Thickness: wall 2.9 mm / bottom 4 mm.

HANDY BODY

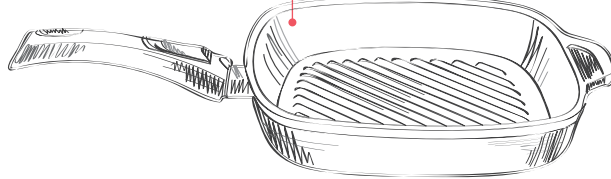

Versatile pan with low walls.
Suitable for frying.
Diameters: 18, 20 cm. Thickness: wall 3 mm / bottom 4 mm.

SQUARE GRILL BODY

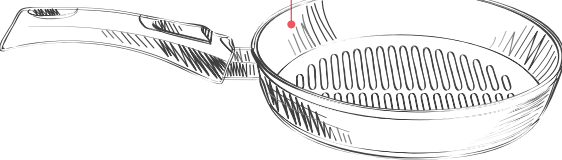

Square grill pan with high ribs (4 mm).
Suitable for frying.
Size: 28 x 28 cm. Thickness: wall 4 mm / bottom 6 mm.

LIGHT-WEIGHT SQUARE GRILL BODY

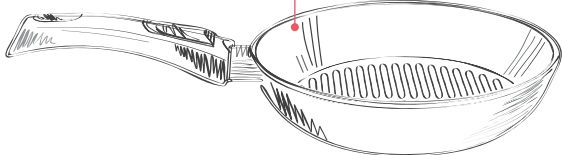

Light-weight square grill pan.
Rib height 2 mm.
Suitable for frying.
Size: 28 x 28 cm. Thickness: wall 3.3 mm / bottom 6 mm.

ROUND GRILL BODY

Pan with low straight walls and grill ribs.
Rib height: 1.5 mm.
Suitable for frying.
Diameters: 24, 26 cm. Thickness: wall 2.4 mm / bottom 4 mm.

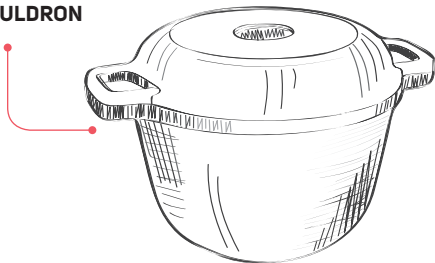

ULTRA-LIGHT ROUND GRILL BODY

Ultra-light pan with low tapered walls.
Rib height: 1.3 mm.
Suitable for frying, quick heating.
Diameters: 24, 26 cm. Thickness: wall 2.9 mm / bottom 4 mm.

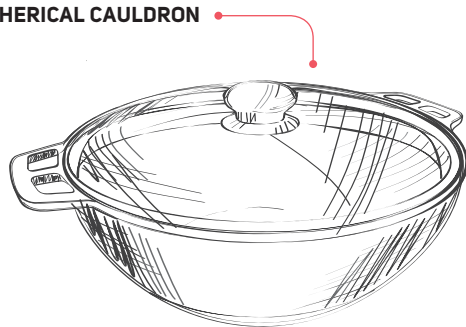

Cookware body shapes

CAULDRON

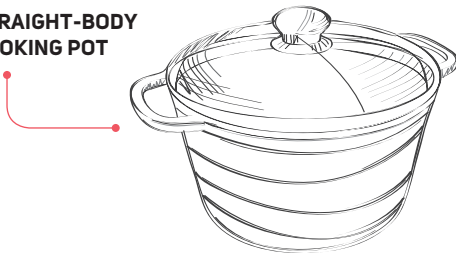

Cauldron with a cover-pan.
Perfect for cooking meat and poultry.
Suitable for frying, stewing, simmering, roasting in an oven.
Volume: 3 l, 5 l, 7 l.

SPHERICAL CAULDRON

Spherical cauldron with a glass lid.
Suitable for frying, boiling, simmering, stewing.
Volume: 4.5 l, 7.5 l.

STRAIGHT-BODY COOKING POT

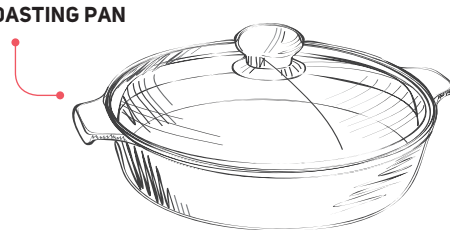

Cooking pot with a glass lid.
Straight body with geometric pattern.
Suitable for all cooking types: boiling, frying, stewing, simmering, sauteing, roasting in an oven without a lid.
Volume: 3 l, 4 l, 5 l, 6 l.

DUCK ROASTER/ GOOSE ROASTER

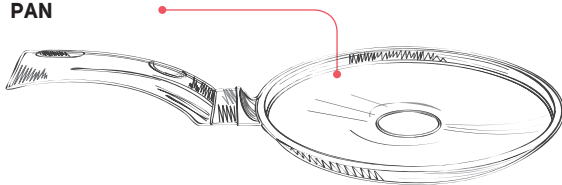

Roaster with a cover-pan.
Perfect for cooking meat and poultry.
Suitable for frying, stewing, simmering, roasting in an oven.
Volume: 3 l, 4 l.

ROASTING PAN

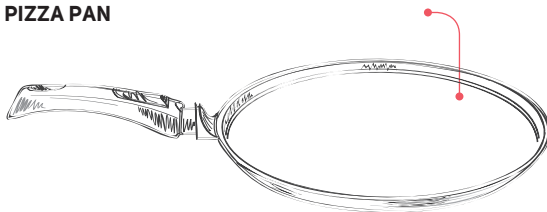

Roasting pan with a glass lid and large bottom.
Suitable for all cooking types: boiling, frying, stewing, simmering, sauteing, roasting.
Volume: 3 l, 4 l, 5 l, 6 l.

PANCAKE PAN

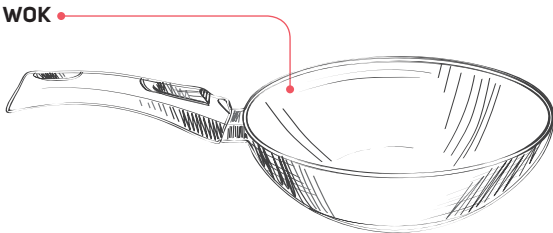

Special-purpose pan with low walls and smooth bottom or with a pattern (cat, sun, smile).
Suitable for pancake making, frying.
Diameters: 20–24 mm. Bottom thickness: 4 mm.

PIZZA PAN

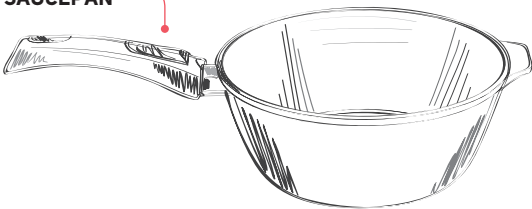

A pan of an optimal size (32 cm) with low tapered walls.
Suitable for pizza or pitta making, pancakes, frying.
Diameter: 32 cm. Bottom thickness: 4 mm.

WOK

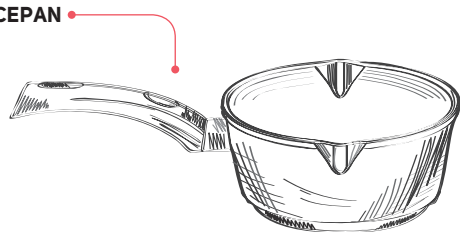

Narrow-bottom pan for Asian cooking.
Suitable for frying, roasting, sauteing.
Diameters: 26, 30 cm. Thickness: wall 3.2 mm / bottom 4.5 mm.

HIGH-WALL SAUCEPAN

High-wall pan.
Suitable for frying, simmering, stewing, boiling.
Diameters: 24, 26 cm. Thickness: wall 3.5 mm / bottom 4 mm.

SAUCEPAN

Thick cast bottom and walls provide for good simmering.
Two spouts for pouring make it easy.
Suitable for sauce cooking, boiling.
Volume: 1.7 l. Thickness: wall 2.5 mm / bottom 6 mm.

FERRA INDUCTION series

Series of cast aluminum cookware Ferra Induction has been created specially for induction cooktops. The cookware is made by using the cutting-edge **Full Induction** technology. The induction disc surface is magnetically conductive, whereby the pans are better sensed by the induction cooktops, and the cookware heats up in 70 seconds to ideal-for-frying temperature*. Thicker walls and bottom of the cookware ensure smooth heating of the pan and feature special heat accumulation. Removable handles add to Ferra Induction functionality by making it usable in an oven.

The key advantage of this series is a multi-layered non-stick coating based on premium Italian materials. The coating is highly wear-resistant, the pan retains non-stick properties and perfect look for a long time.

NATURAL MINERALS series

Natural Minerals collection is a fusion of natural energy, strength of stone and unique advanced technologies. This collection of cookware would make a hit with eco-design enthusiasts. Made of cast body, the cookware heats up evenly, keeping the food juicy without a need of using oil for frying.

Multi-layered Italian non-stick coating makes the cookware highly wear-resistant.

The surface color and texture resembles natural stone.

Note that handles in this collection have a soft-touch coating, so you have a good grip of the handle which feels soft, comfy and warm.

TITAN II series

TITAN II series is a perfect choice for those who value stylish and laconic design combined with durability. Esthetics is undoubtedly important in cooking: classic black is therefore the key color that emphasizes the bright colors of meals and perfectly blends into interior design. The key advantage of this collection is multi-layered non-stick coating based on premium Italian materials. The coating is highly wear-resistant and retains its non-stick properties for long. Thicker walls and bottom ensure even heating of the pan and retain heat longer.

CAST series

Cast pan series is a classical value-for-money collection. Durable cast-iron pan heats up quickly and evenly and retains heat longer. Multi-layered water-and-silicon-based non-stick coating is reinforced with mineral particles for longer pan life. With its excellent non-stick properties you can cook with minimum oil used. Cast pan series offers various shapes, pan types and colors of non-stick coating.

Cast frying pan for pizza has an optimal size of 32 cm and features low tapered walls. Removable handle and low edges make the home-made pizza cooking process comfy and easy. Easily put the dough onto the pan and distribute the filling. Removable handle is reliable and comfy: when putting pizza in the oven, you can remove and put on the handle using one hand. Thickened bottom ensures proper heat accumulation, which makes pizza bake evenly and take golden-brown color. Anti-sticking coating is excellent: the dough is not sticking, the finished dish can be easily and conveniently served.

Cast aluminum body provides for even heating and is protected from deformation

Aluminum lid with heat-resistant bakelite handle

CORROSION-RESISTANT STEEL COOKWARE COLLECTION

PRESTO COLLECTION

Lightweight and elegant cookware of Presto collection will add style to your kitchen space, make you enjoy the look and cook quicker your favorite meals.

Presto collection cookware is made of high-quality corrosion-resistant (stainless) steel 18/10. The cookware surface features a mirror polish both inside and outside. Encapsulated bottom with interim heat-distribution aluminum layer (aluminum disc 3 mm thick) ensures even heating and heat retention. The cookware is suitable for all stove types, including induction cooktops.

VIVO COLLECTION

Vivo cookware collection is made of high-grade corrosion-resistant (stainless) steel 18/10. The cookware surface features a satin polish both inside and outside. Ergonomic design of bakelite handles and durable rivets ensure their comfortable and safe use. Combined lid of stainless steel and heat-resistant glass with a steam hole helps avoiding lid vibration during boiling and controlling the cooking process. With convenient measuring scale on the inner surface you can define the necessary liquid volume. The cookware is suitable for all stove types, including induction cooktops.
